INFORMATION SCIENCES

AN INTERNATIONAL JOURNAL

Volume Contents for 2002

Volume 140, Numbers 1–2, January 2002

Special issue: Interactive virtual environments and distance education
Guest editor: Timothy K. Shih

T.K. Shih
Preface 1

M. Reisslein, F. Hartanto and K.W. Ross
Interactive video streaming with proxy servers 3

S.-T. Li
A platform-neutral live IP/TV presentation system 33

R. Simon, J. Nolan and A. Sood
A light-weight agent architecture for collaborative multimedia systems 53

L.L. Scarlatos
TICLE: using multimedia multimodal guidance to enhance learning 85

F. Chia-I Chang
Intelligent assessment of distance learning 105

S. Holmquist and N.H. Narayanan
An integrated architecture for tightly coupled design and evaluation of educational multimedia 127

F. Lin, L. Ye, V.G. Duffy and C.-J. Su
Developing virtual environments for industrial training 153

Q. Jin
Design of a virtual community based interactive learning environment 171

Volume 140, Numbers 3–4, February 2002

Special issue: Software Engineering: Systems and Tools
Guest editors: Jarallah Al-Ghamdi, Muhammad Sarfraz, Jaoua Ali and Moataz Ahmad

PII: S0020-0255(02)00421-8

J. AL-GHAMDI, M. SARFRAZ, J. ALI AND M. AHMAD
Preface 193

R.D. COWAN, A. MCKENDALL JR, A. MILI, L. YANG, L. WANG, D. CHEN, V. JANARDHANA AND T. SPENCER
Software engineering technology watch 195

J. ALGHAMDI, M. ELISH AND M. AHMED
A tool for measuring inheritance coupling in object-oriented systems 217

S.B. JUNAIDU AND P.W. TRINDER
Parallelising large irregular programs: an experience with Naira 229

N. NADA, M. SHING, V. BERZINS AND LUQI
Automated prototyping tool-kit (APT) 241

M. ELSHAFEI, H. AL-MUHTASEB AND M. AL-GHAMDI
Techniques for high quality Arabic speech synthesis. 255

M. SARFRAZ AND M.A. KHAN
Automatic outline capture of Arabic fonts 269

H.B. AJROUD, A. JAOUA AND S. KAABI
Classes extraction from procedural programs. 283

M.M. GAMMOUDI AND I. NAFKHA
A formal method for inheritance graph hierarchy construction 295

Volume 141, Numbers 1–2, March 2002

T.K. SHIH
Preface. 1

W.-S.E. CHEN AND C.-L. HU
A mobile agent-based active network architecture for intelligent network control 3

D. XU, K. NAHRSTEDT AND D. WICHADAKUL
MeGaDiP: A wide-area Media Gateway Discovery Protocol 37

R.-I. CHANG, M.-C. CHEN, J.-M. HO AND M.-T. KO
Schedulable region for VBR media transmission with optimal resource allocation and utilization 61

N. NEMOTO, K. TANAKA AND M. TAKIZAWA
Quality-based synchronization methods of multimedia objects 81

A.P. VAZHENIN, N.N. MIRENKOV AND D.A. VAZHENIN
Multimedia representation of matrix computations and data. 97

C.-C. CHANG, T.-S. CHEN AND L.-Z. CHUNG
A steganographic method based upon JPEG and quantization table modification 123

S.-L. Lee and C.-W. Chung
Hyper-rectangle based segmentation and clustering of large video data sets 139
T.C.T. Kuo and A.L.P. Chen
A mask matching approach for video segmentation on compressed data 169

Volume 141, Numbers 3–4, April 2002

J. Mańdziuk and L. Shastri
Incremental class learning approach and its application to handwritten digit recognition 193
H.P. Yockey
Information theory, evolution and the origin of life 219
Z.B. Xu, J.Y. Liang, C.Y. Dang and K.S. Chin
Inclusion degree: a perspective on measures for rough set data analysis 227
S.-K. Oh and W. Pedrycz
The design of self-organizing Polynomial Neural Networks 237
B. Liu
Random fuzzy dependent-chance programming and its hybrid intelligent algorithm 259
E. Falkenauer and D.B. Fogel
A note on the hierarchical nature of *n*-parent variation operators in evolutionary algorithms 273
S.K. Madria, M. Mohania, S.S. Bhowmick and B. Bhargava
Mobile data and transaction management 279

Volume 142, Numbers 1–4, May 2002

Special issue: Intelligent Information Systems and Applications
Guest editor: Da Ruan

D. Ruan
Preface 1

Fuzzy analysis systems

R.M. De Moraes, G.J.F. Banon and S.A. Sandri
Fuzzy expert systems architecture for image classification using mathematical morphology operators 7
B.S. Moon, H.C. Lee, Y.H. Lee, J.C. Park, I.S. Oh and J.W. Lee
Fuzzy systems to process ECG and EEG signals for quantification of the mental workload 23

C.-F. HUANG
An application of calculated fuzzy risk 37

C. KAHRAMAN, D. RUAN AND E. TOLGA
Capital budgeting techniques using discounted fuzzy versus probabilistic cash flows 57

Y. NISHIWAKI AND H. MATSUOKA
Combined effects of atomic radiation and other agents in Hiroshima and Nagasaki and possible application of fuzzy theory. 77

Decision support systems

Y. YOSHIDA
Optimal stopping models in a stochastic and fuzzy environment 89

P.L. KUNSCH AND P. FORTEMPS
A fuzzy decision support system for the economic calculus in radioactive waste management 103

É. GRÉGOIRE AND B. MAZURE
About the incremental validation of first-order stratified knowledge-based decision-support systems. 117

H. MATSUOKA, Y. NISHIWAKI, A. RYJOV AND A. BELENKI
An evaluation method on the integrated safeguards based on fuzzy theory 131

J. BENEDIKT, S. REINBERG AND L. RIEDL
A GIS application to enhance cell-based information modeling. 151

Control and Hybrid Systems

P. MELIN AND O. CASTILLO
Intelligent control of aircraft dynamic systems with a new hybrid neuro–fuzzy–fractal approach. 161

Y. YANG, C. ZHOU AND X. JIA
Robust adaptive fuzzy control and its application to ship roll stabilization 177

M. OUSSALAH AND J. DE SCHUTTER
Hybrid fuzzy probabilistic data association filter and joint probabilistic data association filter 195

J. ZHANG, S. KÖPER AND A. KNOLL
Extracting compact fuzzy rules based on adaptive data approximation using B-splines 227

G. RESCONI AND A.J. VAN DER WAL
Morphogenic neural networks encode abstract rules by data. 249

C. Zhou and D. Ruan
Fuzzy control rules extraction from perception-based information using computing with words 275

Volume 143, Numbers 1–4, June 2002

B. Olsson and K. Laurio
Towards a comprehensive collection of diagnostic patterns for protein sequence classification 1
M.E. Dönderler, Ö. Ulusoy and U. Güdükbay
A rule-based video database system architecture 13
W. Pedrycz and A. Gacek
Temporal granulation and its application to signal analysis 47
C.-H. Chou and J.-C. Teng
A fuzzy logic controller for traffic junction signals 73
K. Tsuda, T. Terano, Y. Kuno, H. Shirai and H. Suzuki
A compiler for business simulations: Toward business model development by yourselves 99
K.-W. Lam, S.H. Son, V.C.S. Lee and S.-l. Hung
Relaxing consistency requirement for read-only transactions 115
U. Dogrusoz
Two-dimensional packing algorithms for layout of disconnected graphs 147
E. Bonabeau
Graph multidimensional scaling with self-organizing maps 159
G. Patané and M. Russo
Distributed unsupervised learning using the multisoft machine 181
Y.B. Jun
On filters of implicative semilattices 197
R. Bělohlávek
Determinism and fuzzy automata 205

Volume 144, Numbers 1–4, July 2002

H. Frezza-buet and F. Alexandre
From a biological to a computational model for the autonomous behavior of an animat 1

I. KOBAYASHI, M.-S. CHANG AND M. SUGENO
A study on meaning processing of dialogue with an example of development of travel consultation system. 45

G.A. FORGIONNE
Selecting rail grade crossing investments with a decision support system 75

A. ULTSCH AND F. RÖSKE
Self-organizing feature maps predicting sea levels. 91

I. VLAHAVAS
MACLP: multi agent constraint logic programming. 127

H.J. CAULFIELD
Synthetic simultaneity – natural and artificial 143

S.-W. KIM
On batch-constructing B^+-trees: algorithm and its performance evaluation 151

C. LARGERON AND S. BONNEVAY
A pretopological approach for structural analysis 169

Y. MASATLIOĜLU
Numerical representation of binary relations with multiplicative error function 187

W.-Z. WU AND W.-X. ZHANG
Neighborhood operator systems and approximations 201

W.-L. HUNG AND J.-W. WU
Correlation of intuitionistic fuzzy sets by centroid method 219

H. ROMÁN-FLORES AND M. ROJAS-MEDAR
Embedding of level-continuous fuzzy sets on Banach spaces 227

Volume 145, Numbers 1–2, August 2002

Special issue: Intelligent Learning and Control of Autonomous Robotic Agents Operating in Unstructured Environments
Guest editors: Hani Hagras and Tarek M. Sobh

H. HAGRAS AND T. SOBH
Intelligent learning and control of autonomous robotic agents operating in unstructured environments 1

E. GÜRKAN, İ. ERKMEN AND A.M. ERKMEN
Two-way fuzzy adaptive identification and control of a flexible-joint robot arm. 13

C. ZHOU
Robot learning with GA-based fuzzy reinforcement learning agents. . 45

J. Rosenblatt, S. Williams and H. Durrant-Whyte
A behavior-based architecture for autonomous underwater exploration 69

I. Lopez-Juarez and M. Howarth
Knowledge acquisition and learning in unstructured robotic assembly environments 89

K. Kiguchi, K. Watanabe and T. Fukuda
Generation of efficient adjustment strategies for a fuzzy-neuro force controller using genetic algorithms – application to robot force control in an unknown environment 113

J.M. Roberts, E.S. Duff and P.I. Corke
Reactive navigation and opportunistic localization for autonomous underground mining vehicles 127

E. Cervera and A.P. del Pobil
Sensor-based learning for practical planning of fine motions in robotics 147

T.W. Kim and J. Yuh
Application of on-line neuro-fuzzy controller to AUVs 169

Volume 145, Numbers 3–4, September 2002

Special issue: Bioinformatics – selected from 4th CBGI & 6th JCIS proceedings

P. Jonsson, K. Laurio, Z. Lubovac, B. Olsson and M.L. Andersson
Using functional annotation to improve clusterings of gene expression patterns 183

J. Gu and X. Gu
Evolutionary analysis of functional divergence in TGF-β signaling pathway 195

S. Tsumoto, S. Hirano, A. Yasuda and K. Tsumoto
Analysis of amino-acid sequences by statistical technique 205

Y. Wang and X. Gu
Evolutionary and expression profiles of gene families crucial for central nervous system development 215

H. Iba and A. Mimura
Inference of a gene regulatory network by means of interactive evolutionary computing 225

S. Ando, E. Sakamoto and H. Iba
Evolutionary modeling and inference of gene network 237

W. Huang, D. Nettleton and X. Gu
Expression pattern of yeast sporulation: a case study for regulatory changes after yeast genome duplication 261

Volume 146, Numbers 1–4, October 2002

K. Nørvåg
A study of object declustering strategies in parallel temporal object database systems 1

C.H. Hsieh
Optimization of fuzzy production inventory models 29

Y. Kaneta, N. Shoji, T. Ohkawa and H. Nakamura
A method of comparing protein molecular surface based on normal vectors with attributes and its application to function identification 41

T. Nakagawa, T. Tanaka, T. Ohkawa and H. Nakamura
A filtering method for high-speed retrieval of similar active sites 55

I.A. Sidorov, D.A. Hosack, D. Gee, J. Yang, M.C. Cam, R.A. Lempicki and D.S. Dimitrov
Oligonucleotide microarray data distribution and normalization 67

M. Molla, P. Andreae, J. Glasner, F. Blattner and J. Shavlik
Interpreting microarray expression data using text annotating the genes 75

K. Laurio, F. Linåker and A. Narayanan
Regular biosequence pattern matching with cellular automata 89

A. Lindlöf and B. Olsson
Could correlation-based methods be used to derive genetic association networks? 103

O. Maruyama, H. Bannai, Y. Tamada, S. Kuhara and S. Miyano
Fast algorithm for extracting multiple unordered short motifs using bit operations 115

N. Zafar, R. Mazumder and D. Seto
Application of global computational tools GeneOrder and CoreGenes to the comparative analyses of chordopoxvirus genomes 127

W.S. Yang, Y.D. Chung and M.H. Kim
The RD-Tree: a structure for processing *Partial-MAX/MIN* queries in OLAP 137

T. Okazaki, A. Inoue, K. Inoue, A. Ito and Y. Wang
Non-closure property of space-bounded two-dimensional alternating Turing machines 151

D. Taniar and J.W. Rahayu
Parallel database sorting 171

S. Bandyopadhyay and U. Maulik
An evolutionary technique based on K-Means algorithm for optimal clustering in $\mathbb{R}^N$ 221

M. Sarfraz
Visualization of positive and convex data by a rational cubic spline interpolation 239

Volume 147, Numbers 1–4, November 2002

Z. Pawlak
Rough sets and intelligent data analysis 1

F. Criado, T. Gachechiladze, H. Meladze and G. Tsertsradze
The bag model in language statistics 13

X. Li and W. Yu
Dynamic system identification via recurrent multilayer perceptrons 45

C.F. Martin and Y.C. Ho
Value of information in the Polya urn process 65

N.T. Nguyen
Consensus system for solving conflicts in distributed systems 91

S. Lim and M.H. Kim
Restructuring the concurrent B^+-tree with non-blocked search operations 123

P.G. Calabrese
Deduction with uncertain conditionals 143

G.I. Papadimitriou, A.S. Pomportsis, S. Kiritsi and E. Talahoupi
Absorbing stochastic estimator learning automata for S-model stationary environments 193

G. Chen and Q. Wei
Fuzzy association rules and the extended mining algorithms 201

J.-G. Juang
Intelligent locomotion control on sloping surfaces 229

C.-W. Park, C.-H. Lee and M. Park
Design of an adaptive fuzzy model based controller for chaotic dynamics in Lorenz systems with uncertainty 245

C.-F. Tsai
A network processing model for address learning and IP recognition 267

Volume 148, Numbers 1–4, December 2002

D.H. Hong and S. Lee
Some algebraic properties and a distance measure for interval-valued fuzzy numbers 1

M. Shishibori, S.S. Lee, M. Oono and J.-i. Aoe
Improvement of the LR parsing table and its application to grammatical error correction 11

M. Jiang, G. Gielen, B. Deng and X. Zhu
A fast learning algorithm for time-delay neural networks 27

A. Mousavi and P. Jabedar-Maralani
Double-faced rough sets and rough communication 41

B. Chakraborty and G. Chakraborty
A new feature extraction technique for on-line recognition of handwritten alphanumeric characters 55

J.S. Kim, B.A. Sohn and B.G. Whang
A tolerance approach for unbalanced economic development policy-making in a fuzzy environment 71

I.R. Goodman, D. Bamber, H.T. Nguyen and W.C. Torrez
New applications of relational event algebra to fuzzy quantification and probabilistic reasoning 87

S. Kak
A class of instantaneously trained neural networks 97

J.P. Sutton and I.M.D. Jamieson
Reconfigurable networking for coordinated multi-agent sensing and communications 103

T. Bäck
Adaptive business intelligence based on evolution strategies: some application examples of self-adaptive software 113

A. Rosenfeld and R. Klette
Digital geometry 123

X.S. Zhou and T.S. Huang
Relevance feedback in content-based image retrieval: some recent advances 129

J.V. Ringwood
Diagonalisation of a class of multivariable system via an actuator linearisation technique 139

K.S. Trivedi, S. Dharmaraja and X. Ma
Analytic modeling of handoffs in wireless cellular networks 155

H.D. Cheng and H. Xu
A novel fuzzy logic approach to mammogram contrast enhancement 167

V. Megalooikonomou and Y. Yesha
Quantization for distributed estimation using neural networks 185

D. Li, L.H. Lee and Y.C. Ho
Constraint ordinal optimization 201

T.-R. Tsai
An application of weighted bootstrap method in semi-parametric model 221

K.R. Bhutani, B.B. Chaudhuri and A. Rosenfeld
Corrigendum to "A modified Hausdorff distance between fuzzy sets" 233

Author index to volumes 140–148 235

Title index to volumes 140–148 245

Volume Contents for 2002 251
